

2x

The mounting bracket is formed by two sets, each one contains:
- one U-shaped piece and bolts to attach on the heatsink with more options of squared holes
- 3 pairs of carriage bolts with different lengths (5/10/14cm)
- 3 V-shaped parts of different size to mount on the other side of the mast

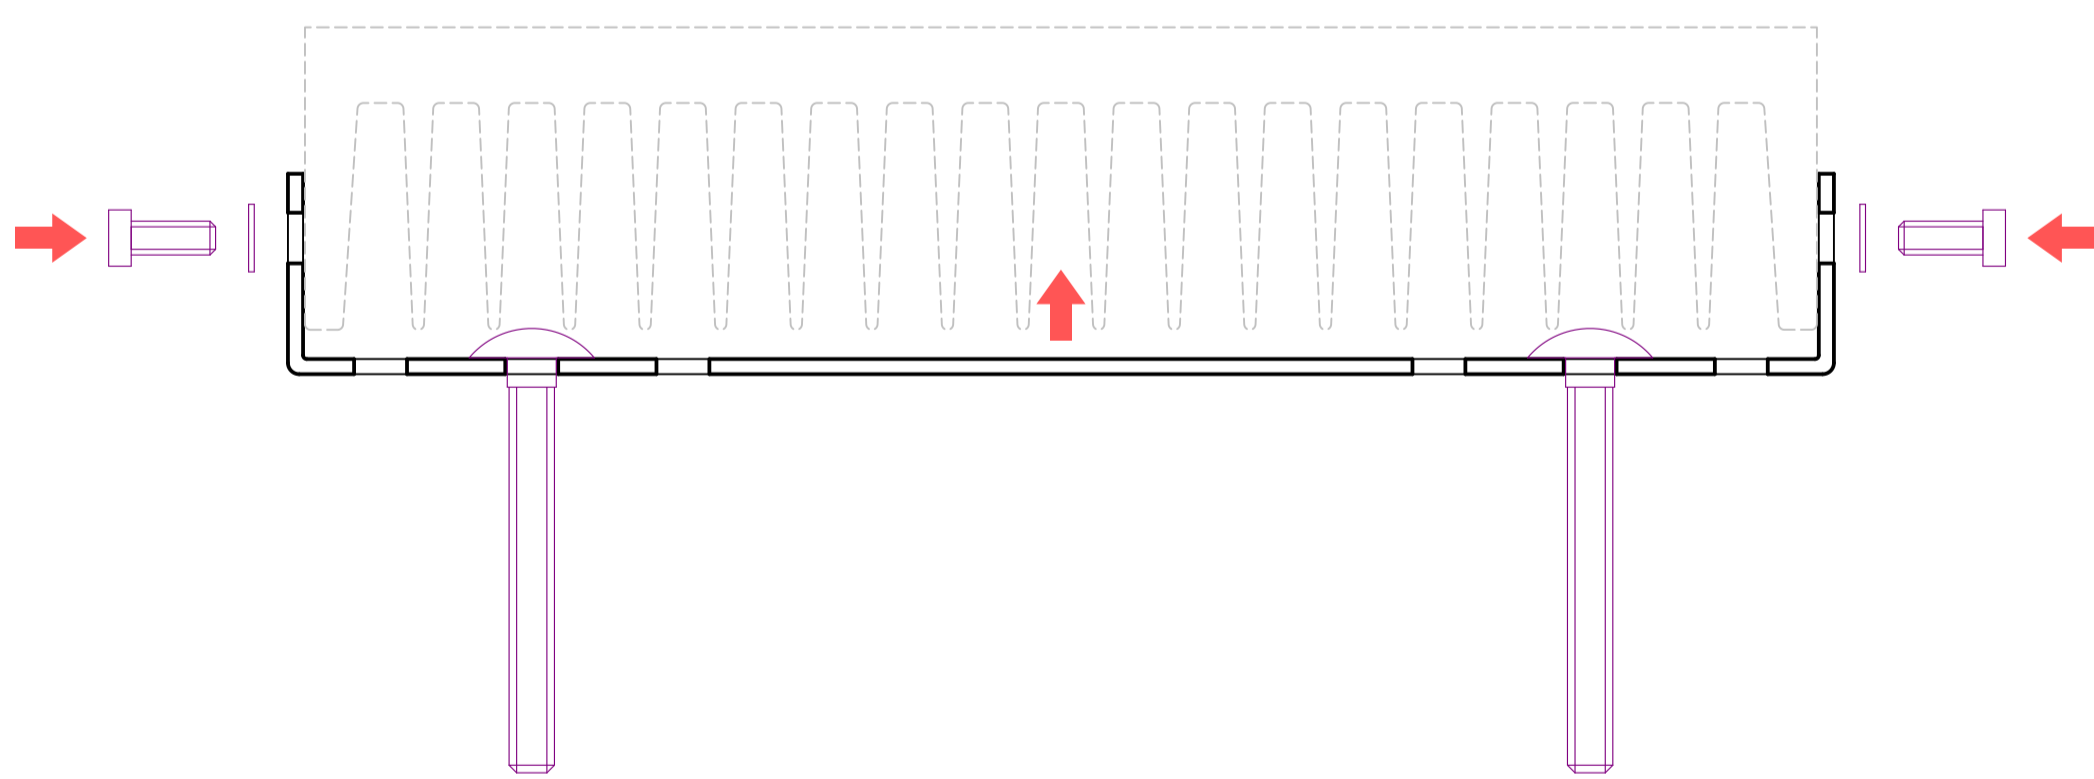

All the parts are made of stainless steel.

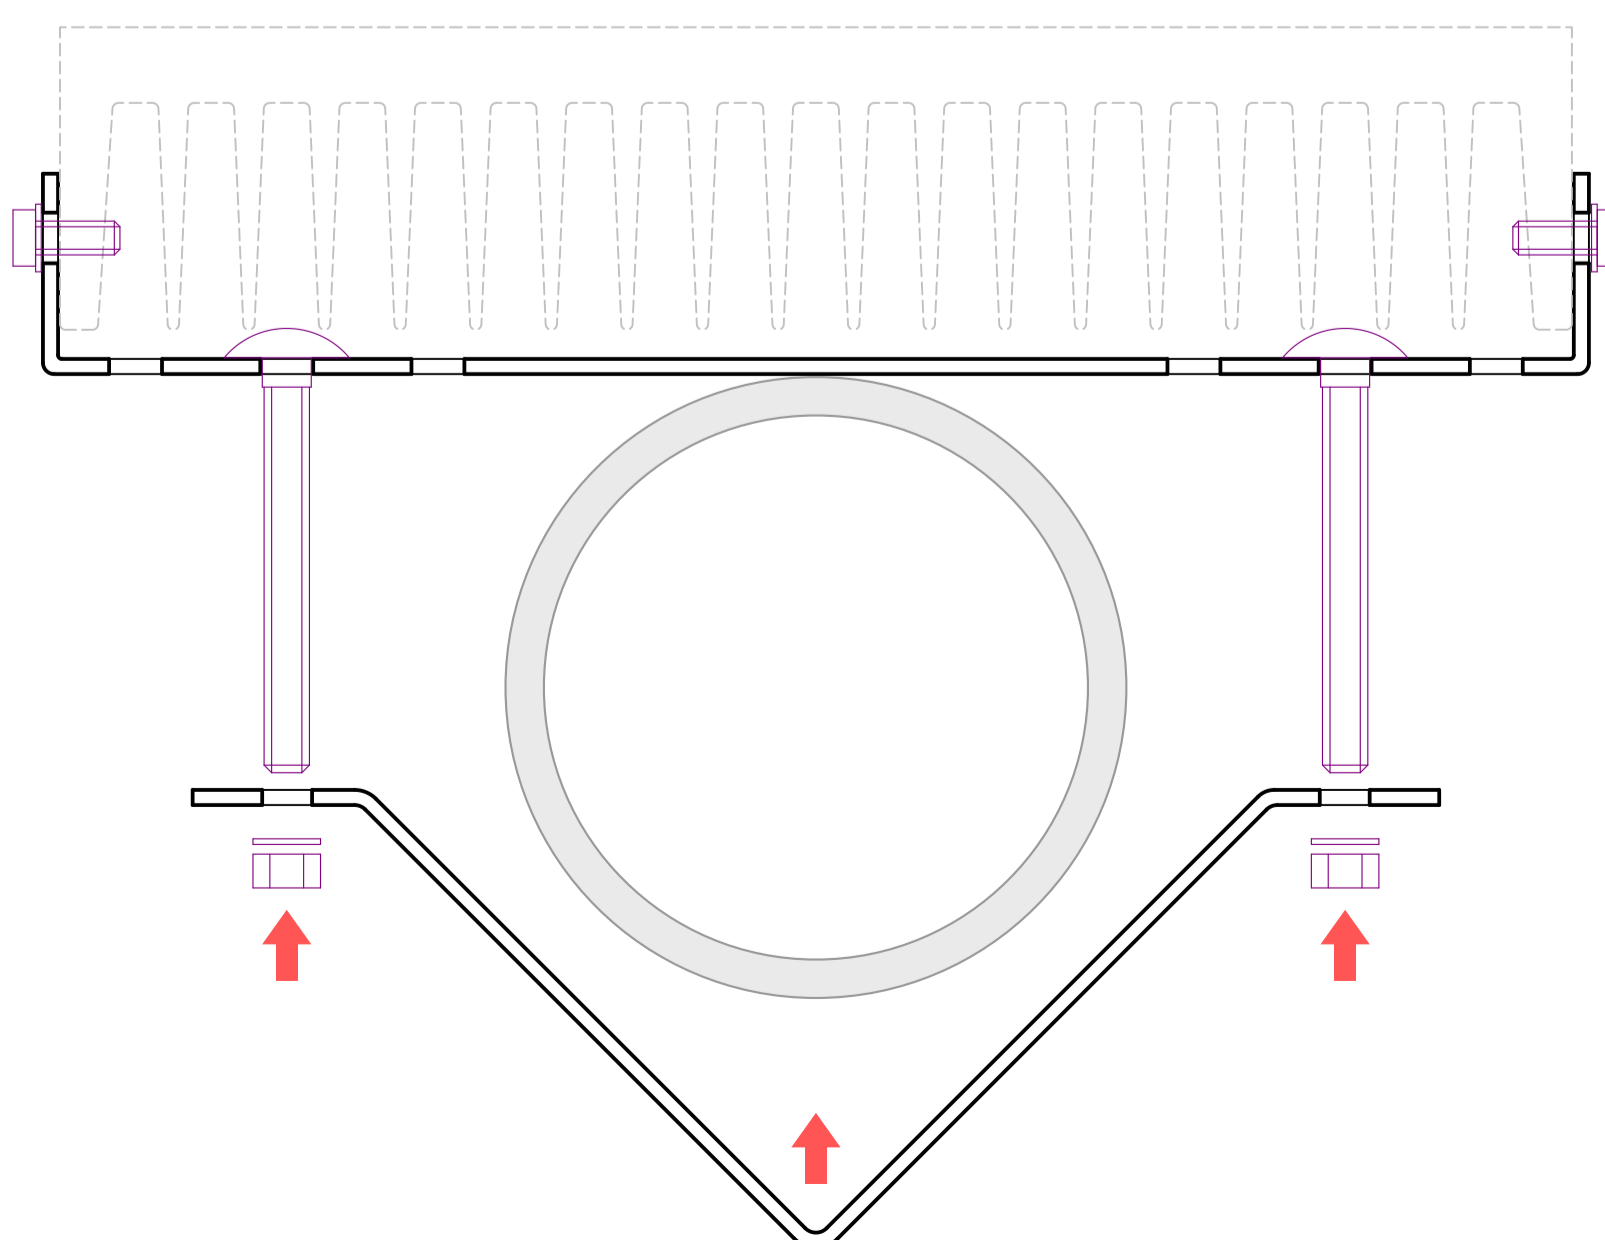

1. Chose the appropriate V-shaped part and carriage bolt, depending on the size of the mast you will attach the SatSite unit

2. Insert the right carriage bolts in the squared holes corresponding to the right V-shaped part.

3. Attach the U-shaped part to the heatsink and fasten it to the heatsink using the provided bolts

3. Insert the V-shaped and mount the SatSite unit to the mast.
